

MyResnet How to Connect

MyResnet SSIDs

My Resnet Start Here

This is where users first connect to get registered on the network.

MyResnet-5G

After registration users should always Connect to MyResnet-5G for the fastest WiFi connection.

MyResnet-2G

Select MyResnet-2G if that is the only SSID your device sees. If you do not see MyResnet-5G, your device may not be able to operate at 5G speeds.

Step 4

Click here to add your devices

Click here to show and change your wi-fi password

Your Devices

DEVICE TYPE	NAME	
Android Phone 60:3A:AF:6E:55:C4	jon android phone	Details  

Step 4

The screenshot shows a web browser window with the URL <https://ptcollege.apogee.us/manage-devices>. The page header includes the PTC | APOGEE logo and navigation links for My Devices, Support, and Account. A 'Set Up Personal Network Wi-Fi Password' dialog is open, showing a password field with a 'Show' button and a 'Save' button. Below this, the 'Add Device' form is displayed with three steps:

- 1. Choose Your Device**: A dropdown menu with 'Amazon Fire' selected.
- 2. Name Your Device**: A text input field containing 'jon amazon fire'.
- 3. Enter MAC Address**: A form with six input boxes separated by colons, representing a MAC address. A 'Clear form' link is below the boxes, and a 'Use image' button with a camera icon is to the right.

A 'MAC Address Help' link is also present next to the MAC address input fields. A large blue 'Add Device' button is at the bottom of the form. Blue arrows point from the 'Step 4' box to the 'Add Device' button and from the 'Helpful Links' section to the MAC address input fields.
